

Good performance at a good value

Good for sanding paint, primer and for use in tough applications like rivets.

FEATURES	BENEFITS
• P-graded aluminum oxide abrasive	• Fast cut and long life
• "Anti-load" stearate	• Excellent load resistance
• Durable C-weight backing	• High tear resistance
	• Effective around rivets

CARBO GOLD DRI-LUBE

8

C-Weight Discs

Durable C-weight, anti-loading discs are recommended for sanding rivets and other surfaces that tend to tear lighter weight papers.

C-Weight Body File Sheets

Anti-loading, durable C-weight body file sheets are great for sanding down fillers, putty and old paint. Fast, non-loading sanding of primers.

Sheets

Flexible A-weight, non-loading paper sheets are a good, general duty sheet for dry sanding applications on metal, plastic or fiberglass automotive surfaces. Good for feather-edging, sanding plastic filler and removing old paint.
