

Eliminating dust and increasing the surface cutting area improves productivity by 35% versus traditional vacuum sanding and by 60% versus non-vacuum sanding. The superior dust extraction of the Carbo CleanAir system keeps the abrasive grain exposed to cut through paint and primer by continually removing the dirt that can clog paper and leave irregular scratches. The end result is that Carbo CleanAir discs cut faster and last longer so productivity gets a boost and dust takes a hike.

Carbo CleanAir Back-Up Pads

Innovative design for optimal air flow and powerful dust extraction. Medium pad 99358 has been re-engineered with a high density, heat-resistant injection molded foam, a molded-in 5/16"-24 spindle and long hooks. Soft pad 99338 is packed with Festo adapter, two threaded bolts: M8 and 5/16"-24 and three fiber ring spacers. The soft pad is only for use on extreme contours using Grip-On 320 grit and finer.
